MODULE: AUDITOR & COMPLIANCE HUB

System Role: Financial Auditor / Compliance Officer

*To ensure every transaction in FamousGate
Hotels is accurate, authorized, and verifiable.*

Auditor & Compliance Hub - Executive Overview

1.1 Purpose and Strategic Importance

The Auditor & Compliance Hub module is designed strategically for the Financial Auditor / Compliance Officer. To ensure every transaction in FamousGate Hotels is accurate, authorized, and verifiable.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

The Auditor starts the day by reviewing the previous day's revenue. They cross-reference the digital records with physical banking slips and provider statements (M-Pesa, Card). Any discrepancies are immediately flagged to the Branch Manager and Accountant.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Revenue Oversight Dashboard

A high-level view of all revenue streams filtered by branch, date, and payment method.

Key Supported Actions: Filter by date range • Export to Excel • View trend lines

Financial Verification Tool

Interface for matching manual bank entries with system-recorded payments.

Key Supported Actions: Mark as Verified • Flag Discrepancy • Attach Bank Slip

3.0 Standard Operating Procedures (SOPs)

Workflow: Daily Reconciliation Flow

Step 1: Pull system revenue report for the previous 24 hours.

Step 2: Identify all M-Pesa and Card payments in the log.

Step 3: Verify these payments appear in the relevant bank/provider statements.

Step 4: Mark each transaction as "Verified" in the Auditor module.

Expected Outcome: Discrepancy-free financial records.

4.0 Advanced Features

Anomaly Detection

System flags unusually high discount rates or void patterns for immediate review.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Payment not found in bank statement

Resolution: Check if payment was sent to the wrong branch till or if provider delay exists.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: BRANCH STOREKEEPER MODULE

System Role: Local Warehouse Manager

*Managing local branch inventory, ensuring
supply availability, and tracking usage.*

Branch Storekeeper Module - Executive Overview

1.1 Purpose and Strategic Importance

The Branch Storekeeper Module module is designed strategically for the Local Warehouse Manager. Managing local branch inventory, ensuring supply availability, and tracking usage.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

The Storekeeper maintains the local pulse of supplies. They ensure that the Kitchen never runs out of ingredients and the Bar never runs out of drinks. Every item movement, whether incoming from Central or outgoing to a department, must be logged.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Stock Request Portal

Electronic requisition system for ordering supplies from Central Store.

Key Supported Actions: Browse Master Catalog • Specify Quantities • Track Request Status

Delivery Verification Screen

Interface for confirming receipt of goods from Central Store.

Key Supported Actions: Record Received Qty • Flag Damages • Sign Off Digitally

3.0 Standard Operating Procedures (SOPs)

Workflow: Replenishment Flow

Step 1: Identify items falling below the re-order point via "Low Stock Alerts".

Step 2: Create a "Stock Request" and submit for Manager approval.

Step 3: Once approved by Branch Manager, it goes to Central Store for fulfillment.

Step 4: Receive physical goods, verify quantities on the "Delivery Confirmation" screen, and update local stock.

Expected Outcome: Maintained stock levels with no operational downtime.

4.0 Advanced Features

Internal Transfer Logic

Enables moving stock between departments like Bar to Kitchen for specific event needs.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Stock levels don't match physical count

Resolution: Check if usage (wastage/sales) was recorded correctly or run a Re-sync.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: CENTRAL STOREKEEPER MODULE

System Role: Central Warehouse Master

*The warehouse master responsible for the entire
supply chain and branch fulfillment.*

Central Storekeeper Module - Executive Overview

1.1 Purpose and Strategic Importance

The Central Storekeeper Module module is designed strategically for the Central Warehouse Master. The warehouse master responsible for the entire supply chain and branch fulfillment.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

The Central Storekeeper is the master controller of the company's inventory assets. They balance the needs of all branches while managing the main repository of goods.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Branch Request Queue

Consolidated view of all stock requests from all hotel branches.

Key Supported Actions: Approve/Reject Requests • Partial Fulfill • Calculate Priority

Fleet Dispatch Manager

Logistics tool for assigning vehicles and drivers to deliveries.

Key Supported Actions: Select Vehicle • Assign Driver • Print Dispatch Note

3.0 Standard Operating Procedures (SOPs)

Workflow: Dispatch & Logistics Flow

Step 1: Review pending branch requests and check Central Warehouse availability.

Step 2: Approve requests and generate a "Pick List" for the warehouse team.

Step 3: Once items are packed, create a "Dispatch Record" in the system.

Step 4: Assign a fleet vehicle and driver to the dispatch note.

Step 5: Complete the dispatch, which notifies the receiving branch.

Expected Outcome: Efficient distribution of goods across the enterprise.

4.0 Advanced Features

Supplier Performance Tracking

Audits how quickly suppliers fulfill Purchase Orders compared to their lead times.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Out of stock at Central

Resolution: Raise a bulk Purchase Order to the main supplier immediately.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: BRANCH ACCOUNTANT

System Role: Branch Financial Officer

*Managing branch-level finances, payments,
bankings, and local expenditure.*

Branch Accountant - Executive Overview

1.1 Purpose and Strategic Importance

The Branch Accountant module is designed strategically for the Branch Financial Officer. Managing branch-level finances, payments, bankings, and local expenditure.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

The Branch Accountant ensures the financial loop is closed every day. No money leaves or enters the branch without being recorded in the system.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Banking Record Module

Digital register for tracking all cash and cheque deposits.

Key Supported Actions: Log Deposit • Record Slip No • Upload Receipt Photo

Petty Cash Manager

Tracking and replenishment tool for local branch expenses.

Key Supported Actions: Issue Cash • Verify Receipt • Request Top-up

3.0 Standard Operating Procedures (SOPs)

Workflow: End of Day Reconciliation

Step 1: Collect shift reports from all cashiers.

Step 2: Verify total cash, m-pesa, and card receipts matching the system expected total.

Step 3: Identify any "Variances" (Shortages/Overages) and log them.

Step 4: Prepare the banking slip for the day's cash collection.

Expected Outcome: Finalized and audited branch financial daily report.

4.0 Advanced Features

Credit Bill Ageing

System tracks outstanding corporate and staff credits by age (30/60/90 days).

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Cash shortage

Resolution: Interview the cashier, check for unrecorded transactions, and log the shortage in their account.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: RECEPTION MODULE

System Role: Front Office Agent / Receptionist

*The front-facing operational module for
managing guest stays and room inventory.*

Reception Module - Executive Overview

1.1 Purpose and Strategic Importance

The Reception Module module is designed strategically for the Front Office Agent / Receptionist. The front-facing operational module for managing guest stays and room inventory.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

Reception is the face of FamousGate Hotels. The team ensures that every guest has a smooth arrival and departure while maintaining 100% room occupancy accuracy.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Room Status Map

Visual grid of all rooms, categorized by status (Clean, Dirty, Occupied).

Key Supported Actions: Check-In Guest • Change Status • View Room Details

Reservation Calendar

Timeline view of all future and past bookings.

Key Supported Actions: New Booking • Edit dates • Cancel Reservation

3.0 Standard Operating Procedures (SOPs)

Workflow: Seamless Check-In Flow

Step 1: Greet guest and search for their reservation or create a walk-in.

Step 2: Verify ID/Passport and record details in the system.

Step 3: Select an available "Clean" room from the room map.

Step 4: Complete check-in, which notifies Housekeeping and activates the guest folio.

Expected Outcome: Guest correctly onboarded and room status updated to "Occupied".

4.0 Advanced Features

Folio Management

Consolidates all guest charges from restaurant, bar, and laundry into one final bill.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Room not ready

Resolution: Contact Housekeeping via the internal status dash to prioritize the clean-up.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: SUPERADMIN MODULE

System Role: System Administrator

*Global control over system roles, security, and
branch configurations.*

Superadmin Module - Executive Overview

1.1 Purpose and Strategic Importance

The Superadmin Module module is designed strategically for the System Administrator. Global control over system roles, security, and branch configurations.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

Superadmins act as the guardians of the system data. They configure the environment to match the specific operational needs of FamousGate Hotels.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

User Management

The master list of all employees and their access levels.

Key Supported Actions: Add User • Deactivate Account • Edit Profile

System Audit Logs

A searchable log of all important system actions.

Key Supported Actions: Filter by User • Filter by Action • Export Logs

3.0 Standard Operating Procedures (SOPs)

Workflow: Security Audit Flow

Step 1: Open the Global Audit logs weekly.

Step 2: Search for sensitive actions like "Delete Reservation" or "Manual Discount".

Step 3: Verify these actions were performed by authorized managers.

Step 4: Flag any suspicious login attempts from unrecognized IP addresses.

Expected Outcome: Maintained system security and accountability.

4.0 Advanced Features

Custom Permission Builder

Create unique roles by toggling over 50 individual system permissions.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Branch not showing data

Resolution: Check branch activation status and verified user assignment to that branch.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: RESTAURANT & BAR POS

System Role: Waiter / Barman / Service Staff

*Detailed service-point interface for taking food
and beverage orders and managing table tabs.*

Restaurant & Bar POS - Executive Overview

1.1 Purpose and Strategic Importance

The Restaurant & Bar POS module is designed strategically for the Waiter / Barman / Service Staff. Detailed service-point interface for taking food and beverage orders and managing table tabs.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

The POS is the engine of service. Staff use it to maintain speed during peak hours while ensuring that every item served is accounted for financially.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Digital Table Map

Visual layout of the restaurant/bar floor showing open and closed tables.

Key Supported Actions: Open Table • Close Bill • Split Items

Touch Order Interface

Speed-optimized menu for quick item selection and customization.

Key Supported Actions: Add to Cart • Apply Topping • Send to Kitchen

3.0 Standard Operating Procedures (SOPs)

Workflow: Order to Table Flow

Step 1: Select a table or "Open Tab" for the customer.

Step 2: Punch in items (Drinks/Food) using the touch interface.

Step 3: Hit "Send" to automatically print chits for the Kitchen and Bar.

Step 4: Track order through "Preparing" and "Ready" statuses on the status board.

Expected Outcome: Accurate order communication and timely service.

4.0 Advanced Features

Inventory sync

Instantly reduces item counts as sales are made to prevent selling out-of-stock items.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Wrong item sent

Resolution: Use the "Void with Reason" function immediately and notify the supervisor.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: MANAGERIAL OVERSIGHT

System Role: Branch Manager / GM

*Oversight tools for Branch Managers and GMs to
monitor performance and drive results.*

Managerial Oversight - Executive Overview

1.1 Purpose and Strategic Importance

The Managerial Oversight module is designed strategically for the Branch Manager / GM. Oversight tools for Branch Managers and GMs to monitor performance and drive results.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

Managers lead by looking at the numbers and the people. The system provides the visibility they need to steer the branch toward profitability.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

KPI Performance Dash

Real-time metrics on revenue, room occupancy, and average basket value.

Key Supported Actions: Compare with Target • View Historical Trends • Branch Ranking

Managerial Approval Queue

In-app notification system for actions requiring higher authorization.

Key Supported Actions: Approve Rebate • Authorize Discount • Approve Expense

3.0 Standard Operating Procedures (SOPs)

Workflow: Operational Drill-Down

Step 1: Open the Performance Dashboard every morning.

Step 2: Identify departments with low revenue or high wastage.

Step 3: Drill down into individual transactions to understand the root cause.

Step 4: Schedule a team briefing to address issues and set corrective targets.

Expected Outcome: Data-driven leadership and operational improvement.

4.0 Advanced Features

Forecasting Engine

Uses historical data to predict next week's occupancy and ingredient needs.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Dashboard showing zero data

Resolution: Verify that previous day sales were successfully synced and closed by cashiers.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: HR & PERSONNEL

System Role: HR Manager / Payroll Officer

*Complete lifecycle management of company
employees from onboarding to payroll.*

HR & Personnel - Executive Overview

1.1 Purpose and Strategic Importance

The HR & Personnel module is designed strategically for the HR Manager / Payroll Officer. Complete lifecycle management of company employees from onboarding to payroll.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

The HR team ensures that FamousGate Hotels is a compliant employer and that every staff member is fairly rewarded for their contribution.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Employee Master File

The secure repository for all employee documents and certifications.

Key Supported Actions: Upload Contract • Track Leave Balance • Issue Warning

Payroll Processor

Automated engine for calculating net pay and statutory deductions.

Key Supported Actions: Calculate Payroll • Generate Payslips • Export KRA/NSSF reports

3.0 Standard Operating Procedures (SOPs)

Workflow: Monthly Payroll Cycle

Step 1: Audit attendance logs from the digital clocking terminals.

Step 2: Review approved leave requests and overtime claims.

Step 3: Run the payroll engine to calculate statutory deductions (SHIF, NSSF, PAYE).

Step 4: Generate and distribute digital payslips to all employees.

Expected Outcome: Accurate, compliant, and timely payment to staff.

4.0 Advanced Features

Automatic Tax Brackets

System stays updated with the latest KRA tax laws to ensure 100% compliance.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Incorrect deduction

Resolution: Check employee profile for manual adjustments or incorrect statutory tier assignment.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: GENERAL CASHIER MODULE

System Role: Central Cashier

*The centralized revenue hub for bill settlement,
payment verification, and master shift management.*

General Cashier Module - Executive Overview

1.1 Purpose and Strategic Importance

The General Cashier Module module is designed strategically for the Central Cashier. The centralized revenue hub for bill settlement, payment verification, and master shift management.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

General Cashiers are the final financial checkpoint. They ensure that for every service provided, the correct payment has been collected.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Settlement Desk

Multi-payment interface for clearing complex guest bills.

Key Supported Actions: Select Payment Method • Apply Voucher • Partial Settlement

M-Pesa Verification Portal

Live API connection to Safaricom to verify transaction legitimacy.

Key Supported Actions: Check Reference • Verify Amount • Search by Phone

3.0 Standard Operating Procedures (SOPs)

Workflow: Master Shift Closure

Step 1: Finish all pending bill settlements.

Step 2: Download the system "Trial Balance" for the current shift.

Step 3: Count physical cash and match against the system expected total.

Step 4: Generate the final "Shift Report" and hand over to the Accountant.

Expected Outcome: Zero-variance shift handover and secure revenue collection.

4.0 Advanced Features

Split Settlement

Allows a guest to pay part of the bill in Cash and part via M-Pesa or Card.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Transaction code not found

Resolution: Ask guest to refresh their M-Pesa messages or check for a reversal from Safaricom.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: FAMOUSGATE SERVICE POS

System Role: Spa Therapist / Specialist Staff

Dedicated POS interfaces for specialized service points such as Spa, Specialty Bars, and Lounges.

FamousGate Service POS - Executive Overview

1.1 Purpose and Strategic Importance

The FamousGate Service POS module is designed strategically for the Spa Therapist / Specialist Staff. Dedicated POS interfaces for specialized service points such as Spa, Specialty Bars, and Lounges.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

Service POS points are designed for high-end guest interactions, allowing for personalized service tracking and flexible billing.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Service Booking Board

Appointment-based interface for tracking sessions and therapists.

Key Supported Actions: Book Session • Assign Staff • Track Duration

Outlet Sales Interface

Niche-specific product list (e.g., Spa Oils, Premium Pours).

Key Supported Actions: Sell Service • Sell Product • Post to Room Folio

3.0 Standard Operating Procedures (SOPs)

Workflow: Professional Service Flow

Step 1: Verify the guest identity and room number.

Step 2: Select the specific service (e.g., Massage) or product being purchased.

Step 3: Assign the therapist/staff member providing the service.

Step 4: Charge the service directly or "Post to Room" for later settlement.

Expected Outcome: Seamless guest service experience with automated tracking.

4.0 Advanced Features

Commission Engine

Automatically calculates staff commissions based on the services they performed.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Guest name not found

Resolution: Check if they have officially checked in at the main Reception.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: KITCHEN DISPLAY SYSTEM (KDS)

System Role: Head Chef / Kitchen Staff

*Real-time order visualization for kitchen staff to
manage food preparation and timing.*

Kitchen Display System (KDS) - Executive Overview

1.1 Purpose and Strategic Importance

The Kitchen Display System (KDS) module is designed strategically for the Head Chef / Kitchen Staff. Real-time order visualization for kitchen staff to manage food preparation and timing.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

The KDS is the brain of the kitchen. It removes the stress of lost tickets and ensure the kitchen produces exactly what the guest asked for.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Live Order Grid

Large-font display of all active orders with preparation timers.

Key Supported Actions: Accept Order • Bump Order • View Recipes

Production Summary

Aggregated view of how many steaks or burgers are needed across all tables.

Key Supported Actions: Check Total Counts • Prioritize Cooking

3.0 Standard Operating Procedures (SOPs)

Workflow: Kitchen Production Flow

Step 1: Watch the grid for new incoming orders from POS.

Step 2: Tap "Start" to notify servers that preparation has begun.

Step 3: Follow the digital item card for special guest instructions.

Step 4: Tap "Complete" when done to alert the waiter for pickup.

Expected Outcome: Reduced "Order to Table" wait times and improved food quality.

4.0 Advanced Features

Station Routing

Automatically sends Grill items to the Grill screen and Pastries to the Pastries screen.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: Order taking too long

Resolution: The system highlights the ticket in Red—assign more chefs to that specific table.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.

MODULE: KITCHEN OPERATIONS

System Role: Executive Chef / Store Coord

*Back-of-house management for recipes,
wastage, and kitchen inventory requisitions.*

Kitchen Operations - Executive Overview

1.1 Purpose and Strategic Importance

The Kitchen Operations module is designed strategically for the Executive Chef / Store Coord. Back-of-house management for recipes, wastage, and kitchen inventory requisitions.

In a world of rapidly evolving hospitality standards, maintaining a robust, scalable digital infrastructure is the only way to ensure lasting competitive advantage. The FamousGate system provides the foundation for this advantage by centralizing all core administrative and operational functions into a single, unified source of truth.

1.2 Operational Philosophy and Core Values

Kitchen Operations ensure that the kitchen is not just cooking, but operating as a profitable business unit.

Every transaction and interaction recorded within this module contributes to a larger data ecosystem that informs critical executive decisions. Staff members are empowered by the system to perform their duties with absolute confidence, knowing that the platform is providing them with the most accurate, up-to-date information available in the industry.

2.0 System Interfaces & Components

Recipe Costing Tool

Detailed breakdown of ingredient costs for every menu item.

Key Supported Actions: Adjust Recipe • Calculate Margin • Update Prices

Wastage Register

Interface for logging burned, spoiled, or returned food items.

Key Supported Actions: Log Waste • Specify Reason • Get Mgr Approval

3.0 Standard Operating Procedures (SOPs)

Workflow: Stock Control Flow

Step 1: Calculate daily needs and raise a "Kitchen Requisition" to the Storekeeper.

Step 2: At the end of service, record any items that were wasted or spoiled.

Step 3: The system calculates the "Variance" between items sold and ingredients used.

Step 4: Review the usage report to optimize future ordering.

Expected Outcome: Minimized cost of sales and reduced food waste.

4.0 Advanced Features

Inventory Depletion Logic

Automatically deducts individual ingredients (e.g., 200g Beef) from stock when a Burger is sold.

5.0 Daily Operational Checklists & KPIs

Shift Protocols

- Log into the FamousGate terminal using your unique credentials.
- Review and acknowledge all pending task alerts and system notifications.
- Perform hardware health checks on local peripherals (Printers, Scanners).
- Document and escalate any critical system anomalies immediately to IT support.

Performance Indicators

- System Accuracy: Percentage of records requiring zero post-transaction correction.
- Processing Velocity: Average time taken to complete core module workflows.
- Compliance Rating: Total number of non-standard system overrides performed.

6.0 Troubleshooting Protocols

Problem: High ingredient variance

Resolution: Audit recipe measurements and ensure every single waste item is being logged.

7.0 Compliance & Data Integrity

Access to the information contained in this module is restricted to authorized personnel only. All data interactions are logged and audited to ensure compliance with the Kenya Data Protection Act and internal security protocols.

CRITICAL SECURITY NOTICE

Any unauthorized attempt to access, modify, or export sensitive guest details from this module without explicitly documented management approval is a violation of company policy and may lead to immediate termination and legal prosecution.
